

# Sensory Play

*Friday, November 22  
6pm to 8pm*

Sensory experiences can be a motivating factor in your child's learning experience.

Drop in to the storytime room where we offer an area for kids to improve social play & develop their fine motor skills while investigating & exploring sensory stations, such as water beads, a rice pool, crafts, & more!

This program is designed for children with special needs. Siblings are welcome. Caregivers must stay & play with their children.
